Sub: Water Tank Cleaning & Borwell Issues - essential services at Jaipuria Sunrise Greens, Indirapuram.

Sir,
In reference to our earlier letter dated: 9th July 2015 regarding water & borewell issues, as you know there has been many disruptions of essential water supply to residents due to a single borwell for residential use. You were requested to provide an additional borwell that has not been addressed yet and residents are always at risk of suffering from essential service like water.

Recently the society faced acute water shortage due to fault in the water pump since 7th July 2015 till 15th July and also faced the same situation in the month of May/June 2015 and earlier many times. Everytime your water pump goes down, you failed to provide any alternative means of water to residents and residents/SGRWA is bound to purchase water from Tankers that is very costly affair. We had to purchase Water Tankers worth Rs. 1.10 lacs due to your Faulty Water pump only in the month of July 2015. Purchases prior to July 2015 will be shared to you shortly. Request you to kindly remit/reimburse the same to SGRWA as it was your liability to provide water to residents. Also request you to kindly make arrangements of additional borwell as to avoid such issues in future.

Through this letter, I wish to draw your attention that water quality these days at Jaipuria Sunrise going down and water tanks needs cleaning and purification urgently. Kindly share with us your Water cleaning schedule of when it was done last time and when its due next. Kindly clean all tanks ASAP.

All Water Tanks overflows daily as the overflow sensors are not working since long, it is damaging building structure continuously that is a serious problem, kindly take urgent care.

With Regards,

For, SGRWA
